SUMMARY COMMENT

Are there particular efforts and/or issues that you would like to highlight for this reporting period related to your community's work to achieve the Reaching Home minimum requirements? In particular, please describe your community's efforts to set-up or improve the Coordinated Access governance structure, including processes to ensure that policies and protocols, as approved by the governance group(s), are being implemented across the system as intended to achieve desired results.

We are in the process of formalizing a coordinated access sub-project. The identified organization who may become the coordinated access sub-project has previously undertaken work around data sharing, policies, advocacy and engages with all community organizations providing services to those experiencing / at risk of homelessness. We also continue to engage in the Built for Zero initiative.

As a community in the Province of British Columbia, Community Entities are in a process to support identifying the best type of HIFIS licensing moving forward and have been involved in trilateral discussions with Employment and Social Development Canada (ESDC), BC Housing and the BC 13 Community Entities on the HIFIS functions and licensing and how to best connect any new HIFIS with existing HIFIS information systems. We are currently under taking a System Mapping exercise to help inform this process with support from ESDC.
